

## Project Manager Software Development (80-100%)

Join the team and help us cool down the planet and setting carbon standards. Carbon Standards International provides a strong foundation for meaningful climate action. We are headquartered in Switzerland but work internationally. As part of the EASY-CERT group, which operates in 46 countries, we are well embedded in a great network of companies and IT infrastructure. We are a dynamic and innovative company targeting exponential growth. As we continue to expand, we are looking for an experienced and visionary **project manager in the software development area** to further support our software strategy and goals.

Learn more at [www.carbon-standards.com](http://www.carbon-standards.com)

### Location & working model

On-Site in Frick (Switzerland), Vienna (Austria), or Munich (Germany) – app. 30% remote work possible

### Key Responsibilities:

- **Manage end-to-end software development projects** (python/angular technology stack)

Our IT Tool portfolio currently contains six different products, which are used by customers, external partners and employees. Most of the tools are embedded within a framework with authentication requirement for login. APIs services allow an efficient connection and data exchange with chosen market players, partners and scientific boards. The results are happy stakeholders, efficient certification flows and fast C-Sink credit issuance.

- **Oversee a diverse IT tool portfolio** consisting of multiple products used by customers, external partners, and internal teams.
- **Communicate with stakeholders and leadership** on a frequent basis
- **Coordinate and collaborate with cross-functional teams** to align technical solutions with business objectives and stakeholder needs
- **Define** scope, timelines and deliverables **while monitoring** progress, risk and budget
- Ensure the **alignment** of developments **with business goals and software strategy**
- **Collaborate with different departments** to ensure necessary information is present for developers to build features and functionality.

## Your profile

- **Bachelor's degree** in Computer Science or IT, and education in project management (scrum, agile methodologies)
- **Work experience** in project management, and willingness to take project leads and full responsibilities
- **Experience in software development procedures** and environments
- Exceptional **communication and management skills**. Excellent **analytical, strategic, and creative thinking skills**.
- **Fluency in English and German**
- Ability to thrive in a dynamic environment.
- Bonus: Familiarity with tools such as Jira, Confluence
- **Bonus: Experience in Carbon Market**, ESG communication, climate tech.

## What We Offer

- Innovative, motivated and supportive team to work with. Close collaboration with Chief Software Officer, development team and project stakeholders.
- Flexible working hours
- Modern infrastructure
- Purpose oriented work - let's have a positive climate impact together and cool down the planet.
- Personal growth opportunities
- Competitive salary

## How to Apply

Are you a forward-thinking, innovative IT project leader with expertise and a hands-on mentality? Then please send us your application. We are looking forward to hearing from you.
