

Prices 2021

World-Climate Farm

Our pricing models are as climate-friendly as our World-Climate Farm services.

| Fees | Prices (EUR) |
|------|--------------|
|------|--------------|

| | |
|-------------------------|----------------|
| World-Climate Farm Tool | Free of charge |
|-------------------------|----------------|

We are in the pilot phase and are not yet charging any fees.

| Sampling and analysis | Prices (EUR) |
|-----------------------|--------------|
|-----------------------|--------------|

| | |
|-----------------------------|----------------|
| Sampler training (one-time) | Free of charge |
|-----------------------------|----------------|

We are in the pilot phase and are not yet charging any fees.

| | |
|---------------|-----------------------------|
| Soil analysis | depending on the laboratory |
|---------------|-----------------------------|

Prices for assessing humus content depend on the type of soil survey and the laboratory used. At least once a year, performed and invoiced by one of our authorised laboratories.

| Inspection and certification | Prices (EUR) |
|------------------------------|--------------|
|------------------------------|--------------|

| | |
|---------------------------------------|----------------|
| Inspection and certification (annual) | Free of charge |
|---------------------------------------|----------------|

Inspection and certification are performed by bio.inspecta. We are in the pilot phase and are not yet charging farms for our services.

Customers residing in Switzerland or Liechtenstein are subject to value added tax of 7.7%.
