

Prices World-Climate Farm

Our pricing models are as climate-friendly as our World-Climate Farm services.

Label fee		Prices (EUR)	per
Use of World-Climate Farm Standard and Tool	Valley area	1.00	ha
	Mountain area	0.50	DGVE
	Tropical	0.50	ha

The World-Climate Farm Standard provides the basis for calculating your carbon footprint. The World-Climate Farm Tool is the instrument for its calculation. By using the Standard and the Tool, you have the possibility to quickly and efficiently record the climate-relevant data of your farm via a cloud. Furthermore, you can evaluate the results of your carbon footprint over several years and compare your farm with others. The evaluation of the results provides the opportunity to improve your carbon footprint step by step. In addition, it enables you to be awarded the World Climate Farm logo.

Climate assessment

The calculation, inspection and certification of your World Climate Footprint are carried out and invoiced by our accredited partners. You will receive your personal offer as soon as you have registered with us.

Customers residing in Switzerland or Liechtenstein are subject to value added tax of 7.7%.
